# Toluna's AI Journey

# The Solution Tested

## Rapid Claims Screening Powered by HarmonAlze Personas

Screen more claims in less time

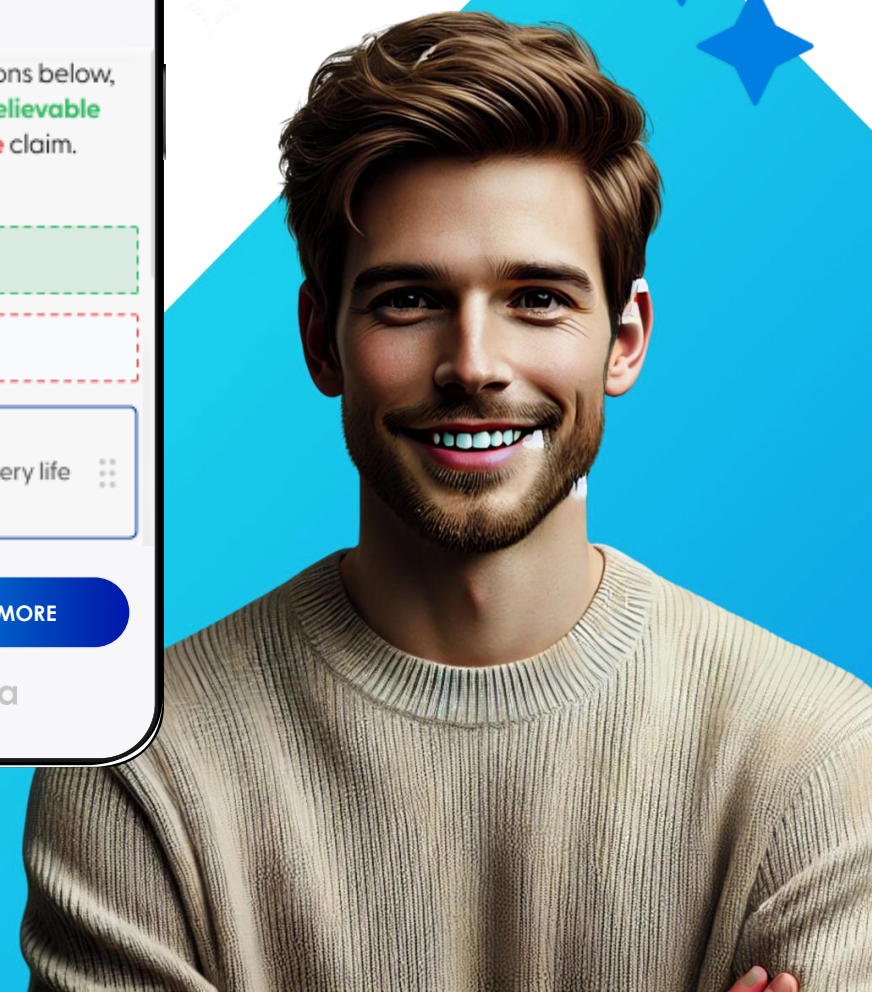

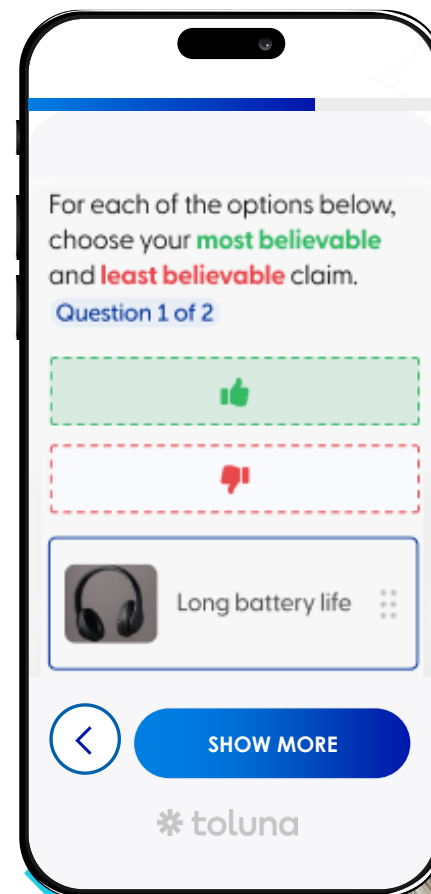

Keep sensitive information safe

No fraud, fatigue or attention issues

High correlations in parallel tests

# Key Findings

## Parallel Test: Cell 1 Humans versus Cell 2 Personas

The **top claims** from synthetic survey-takers were **highly similar** to the top claims from humans.

Synthetic survey-takers showed **more discrimination** across claims than humans and **more coherence** between preference and likely to purchase.

Humans were more likely to select claims they most preferred in the maxdiff in their top 5 on uniqueness (perhaps a recency effect).

Choice Rankings Similar

Persona Results Less “Noisy”

Uniqueness Differences on Ranking Task

# High Correlation Between Human and Persona Results from MaxDiff Tradeoffs Exercise

0.75

Correlation of rank order  
of 26 claims

(human versus synthetic  
survey-takers)

# Substantial Overlap Between Top Claims of Humans and Personas

Comparison of Top Claims (60%+ Threshold)

**Humans**

**Both**

**Personas**

- Claim A
- Claim B

- Claim C
- Claim D
- Claim E
- Claim F
- Claim G
- Claim H
- Claim I

- Claim J
- Claim K

# Hormel's Experience & Reactions

**Dave Anderko**

Insights Lead, Hormel Foods

---

Partnering with Toluna on a beta test (and case study) involving AI and innovation in research was a great experience and very enlightening."

**Angela Spathis**

Insights Sr. Mgr, Applegate & Justin's

---

While the 'personas' are not identical to humans (which is a good thing!), they provide helpful data and there will be many opportunities within the research spectrum to include them in the future. Great to see Toluna leading in this area."

# Hormel: Potential Adoption Path to Build Organizational Confidence

Using synthetic survey-takers to **screen large numbers of claims** can be a useful way forward **on its own** or **to identify a smaller subset to test with humans**.

# Toluna: Agile Solutions to Support Client Innovation
